## SUMMARY

Software Engineering graduate specializing in **Frontend Performance** and **State Management architecture**. Expertise in building high-performance, SEO-optimized web applications using **Next.js 16, React, and TypeScript**. I focus on solving UI bottlenecks, minimizing layout shifts (CLS), and managing complex global states rather than just building layouts. **Available for full-time internship and employment.**

## SKILLS

| | |
|---|---|
| **Languages:** | TypeScript, JavaScript, HTML/CSS |
| **Frameworks/Libs:** | React, Next.js 16, SCSS/SASS, Framer Motion, PWA |
| **State Mgmt:** | Zustand, TanStack Query, React Hook Form, Zod |
| **Tools & Arch:** | Figma, Git/GitHub, Vercel, Firebase |

## FEATURED PROJECTS

07/2025 – 03/2026

### TechStore — Production E-commerce UI

Role: **Full-Stack Developer** | Demo: website-for-aunt.vercel.app

Next.js 16 · TypeScript · Zustand · SCSS · Framer Motion · PWA · next/image

Built a Next.js 16 App Router storefront spanning 27 routes, VI/EN/ZH localization, PWA behavior, and responsive administration.

- **Rendering & data:** Parallel Server Component fetching via `Promise.all` with 60-second ISR; passed initial data to the client to avoid request waterfalls while preserving SEO.
- **Performance:** Used `next/image` for Cloudinary, dynamically imported Socket.IO chat with `ssr:false`, route loading states, and Workbox PWA caching/reload-online behavior.
- **State & UX:** Split Zustand stores for auth, cart, compare, recently viewed, and chat; persisted state and built cart drawer, comparison, theming, and responsive admin/storefront flows.
- **Search interaction:** Added a 350ms debounce before API calls; supports typos, SKU, VI/EN/ZH synonyms, and Ctrl/Cmd+K Spotlight Search.
- **Checkout UX:** Validates vouchers by product and reserves them for 10 minutes; disables Place Order while submitting and clearly displays MoMo status.
- **Quality:** Strict TypeScript, Zod/React Hook Form, Jest + Testing Library for stores/components, and CI lint/test checks.

02/2024 – 01/2025

### POMI Milk Tea — Web & Mobile Interface

Role: **Backend Developer** | Source: github.com/nlgiahuy01112003/pomi_web

React · Redux Toolkit · Ant Design · Socket.IO · Flutter · .NET

Backend Developer for a multi-platform F&B system, responsible for API design, real-time synchronization, and web/mobile integration.

- **Real-Time DOM Updates:** Developed a kitchen dashboard that dynamically injects **Socket.IO** event payloads into React state without re-rendering the entire DOM tree.
- **Component Architecture:** Designed and maintained a reusable UI component library across the web portal using React and Ant Design to ensure consistency.
- **Map Integration:** Integrated Leaflet/Mapbox to display interactive branch locations and dynamic delivery zones based on the user's geolocation.
- **Performance:** Implemented lazy loading and optimized Cloudinary image fetching to ensure the POS interface loads instantly even on legacy tablet devices.

## OTHER PROJECTS

2024

### SVM Credit Prediction

Source: github.com/nlgiahuy01112003/SVM_Project

Python | Pandas | NumPy | Scikit-learn | Tkinter

- Machine learning desktop application to predict credit repayment using **Support Vector Machines (SVM)**.
- Addressed imbalanced dataset using **SMOTE** synthetic data generation and **Grid Search** hyperparameter tuning.
- Built a Python Data Pipeline with **Tkinter** Desktop UI for data visualization and prediction results.
- **Note:** The project is limited due to the lack of a real dataset for legal reasons.

2024

### Anime Social Media

Source: github.com/nlgiahuy01112003/social-media-anime

React | Node.js | Express | PostgreSQL | Socket.IO

- Specialized social networking platform for the **Anime community** featuring real-time updates.
- Implemented real-time interactions using **Socket.IO** for live notifications and chat features.

2023

### Charity Management Web

Source: github.com/nlgiahuy01112003/Website_quan_li_hoat_dong_tu_thien

Java | Spring Boot | Spring Security | Hibernate | MySQL | Thymeleaf

- Web platform for managing charities and tracking donations, integrated with **PayPal** payment gateway for secure transactions.
- Built full CRUD operations, secure user authentication (Spring Security), and a dynamic dashboard (Thymeleaf).

## EDUCATION

09/2021 – 01/2026

### Engineer's Degree in Information Technology (Software Engineering)

HUTECH University — GPA: 2.86/4.0

- **Core foundation:** Studied data structures and algorithms, object-oriented programming, databases, operating systems, computer networks, and software testing.
- **Frontend practice:** Developed team-based web/mobile interfaces with emphasis on responsive design, interaction flows, API integration, UI testing, and Git collaboration.
- **Leadership & activities:** Led teams across multiple courses; served as a class officer and Faculty Youth Union officer; organized and coordinated volunteer, nonprofit programs involving students from both the class and faculty.

## CERTIFICATIONS & LANGUAGES

- **CEF B1 English — HUTECH:** Examined Nov 8, 2025; issued Dec 4, 2025; credential DKC25B110140.
- **Udemy — Flutter Development Bootcamp with Dart:** Angela Yu; completed May 19, 2026; 29 hours; ID UC-e73b7f5e-3c99-42fd-9c6d-e4788b720e3c.
- **Udemy — Full-Stack Web Development Bootcamp:** Angela Yu; completed May 19, 2026; 62 hours; ID UC-581cf652-6894-4f7a-ad7a-1f44e0b2278e.
- **Communication & Teamwork — HUTECH:** Issued Apr 18, 2025; active listening, team coordination, and problem-solving training.

## EXPERIENCE

12/2025 – 06/2026

### IT Helpdesk / Manual Tester / Software Deployment

EMPOWER SC

- Supported the **Dimchan All-in-One** ecosystem for F&B and retail businesses across sales, POS, printing, and operational management workflows.
- Received support requests, identified software, device, or connectivity issues, and guided users toward appropriate resolutions.
- Executed **end-to-end manual tests** across web/mobile applications and validated POS terminal and printer compatibility in real operating scenarios.
- Documented failure conditions, symptoms, and reproduction steps; submitted structured tickets and supplied additional context to the development team during investigation.
- Configured devices and deployed software on-site for client partners, troubleshooting handover issues to bring systems into operational use.

08/2025 – 10/2025

### IT Support / IT Helpdesk

HCMC Digital Transformation Center (DXCENTER)

- Handled support requests and guided users through workflows on the **HCMC Public Service Portal** and **Document Management Portal** (motcua.tphcm.gov.vn, qlvb.tphcm.gov.vn).
- Analyzed user feedback, reproduced incidents, and identified the affected scope before escalating findings to the responsible technical team.
- Performed functional testing across interfaces and business workflows, with attention to edge cases occurring in the production environment.
- Documented and consolidated defects while gaining hands-on experience supporting government systems serving thousands of users daily.
